MARGRET & H. A. REY
INSTITUTE
for Nonlinear Dynamics in Medicine

Post-doctoral position wanted

The joint laboratory of Center for Adaptive Data Analysis at National Central University and Institute of Nonlinear Dynamics in Medicine affiliated with Harvard Medical School is now seeking for several highly motivated and enthusiastic Postdoctoral researchers interested in biomedical signal analysis to join our team.

Requirements:

- Good background in Mathematics, Physics, and Engineering. Prior experience of signal processing is preferred.
- Some programming skills in Matlab, C or C++.
- Candidate must also be capable of taking initiative, work independently.
- Excellent communication skills are required, as are excellent organizational skills and have good english writing skills.

To apply, please send a single file that incorporates CV with a brief description of research experience, career goals and contact information.
